Jim Breitenfeld, the EDC's New TeCMEN Manager

December 9, 2009

The EDC is happy to announce Jim Breitenfeld as the new Technology Coast Manufacturing and Engineering Network Manager. Jim was actually on-board with the EDC when Dr. Goetsch first introduced the TeCMEN concept to Okaloosa County business leaders in 1989.

Jim plans on revamping the TeCMEN format and has already pulled together a small group of business leaders to collaborate on their ideas on how TeCMEN can truly benefit the technology-based businesses in our area. This first meeting created excitement for the EDC because TeCMEN has always been a beneficial program for our technical business community and now it elevate to a new level of support that will involve many of the original objectives for this collaborative group of manufactures and engineering companies.
